IDENTIFIERS	African Americans; *Texas

ABSTRACT

The Texas Education Code requires the Texas Education Agency to submit a comprehensive biennial report on the number of students retained in grade level in the Texas public school system. This report presents a summary of the literature on the effects of grade level retention on the academic, social, and psychological development of students, along with an overview of student retention policy in Texas. Data on retention statewide, accumulated over a 3-year period since the 1992-93 school year, by grade, ethnicity, gender, and other student characteristics are also presented. The trends in this report will inform the decisions of policymakers and educators. In 1994-95, 128,369 students were retained in grade, for an annual retention rate of 4%. The highest retention rate was found for grade 9, and the highest retention rate for elementary school was at grade 1. Males were retained more often than females, and Hispanic and African American students were retained more often than White students. The highest retention rates were for urban districts and for districts with the highest percentages of minority and economically disadvantaged students. Research has shown that retention in grade does not help students academically or socially, and that those who repeat a grade are more likely to drop out of school. Four appendixes contain data on retention by grade and ethnicity, retention by district, retention by campus characteristics, and district retention rates by grade. (Contains 12 tables, 3 figures, and 52 references.) (SLD)

Highlights

How many students are retained in Texas?

- In 1994-95, 128,369 students were retained in grade
- 4.0 percent annual retention rate in 1994-95
- The highest retention rate is found in Grade 9
- The highest retention rate in the elementary grades is found in Grade 1

Who is retained?

- Males are retained more often than females
- Hispanic and African American students are retained more often than White or other ethnic group students
- Economically disadvantaged students are retained more often than non-economically disadvantaged students

Where are they retained?

- Districts in urban areas had the highest retention rates in 1994-95
- Districts and campuses with higher percentages of minority and economically disadvantaged students have higher retention rates
- Middle schools on year-round calendars have lower retention rates than middle schools on traditional calendars

Does grade level retention help students?

- Research has shown that student retention does not help students academically or socially
- Students who repeat a grade are more likely to drop out of school
- The emotional effects of retention on students negatively impact later learning

Introduction

Texas Education Code §39.182 requires the Texas Education Agency (TEA) to submit a comprehensive biennial report on a summary of information including the number of students retained in grade level in the Texas public school system.

Grade level retention is defined as having a student repeat a given unsuccessful grade, or holding back children who are of appropriate chronological age but are not developmentally ready or mature enough to enter school (Shepard, 1989). Although expensive, grade level retention has traditionally been the chief remedy for academic failure and remains today a nearly universal practice. In Texas, 128,369 students were retained in 1994-95. At an average per pupil cost of $4,504, Texas spends an estimated $578 million for each extra year of schooling for retained students.

The primary goal of student retention is to give students a year to grow and to master the academic tasks of their current grade level before advancing to the next level. However, a large body of research draws strong and almost unanimous conclusions that retention does not help students on either personal adjustment or academic outcomes.

This report presents a summary of the literature on the effects of grade level retention on the academic, social, and psychological development of students, along with an overview of student retention policy in Texas. Data on retention statewide, accumulated over a three-year period since the 1992-93 school year, by grade, ethnicity, gender, and other student characteristics are also presented. The trends identified in this report will provide the legislature, State Board of Education, and Texas Education Agency with a basis for reviewing state policies to encourage educators to develop alternative programs and curriculum appropriate to meeting the specific and unique needs for students at risk of school failure.

Literature Review on Student Retention

Student retention in grade is widely practiced in the United States, although research has consistently shown that it does not help students academically or socially (Shepard and Smith, 1990; Foster, 1993; Harvey, 1994).

Foster (1993) points out that a large number of meta-analyses and syntheses of retention studies confirm the notion that children recommended for retention, but who are promoted anyway, do at least as well or better than similar children who are retained in order to improve their academic skills (Bossing and Brien, 1980; Byrnes and Yamamoto, 1985; Holmes, 1983; Holmes and Matthews, 1984; Shepard and Smith, 1989). Martinez and Vandegrift (1991) state that the cumulative evidence against grade retention is compelling, with retention consistently associated with subsequent poor academic achievement, low self-esteem, negative attitudes toward school, and high dropout rates.

Meisels and Liaw (1993) used data from the National Education Longitudinal Study of 1988 to conduct a study on the phenomenon of retention in kindergarten through Grade 8. Two analyses were conducted. First, students who were retained in kindergarten through Grade 3 were compared to students who were retained in Grades 4-8. In the second analysis, retained students in kindergarten through Grade 8 were compared to the total sample of nonretainees. Results suggested that the timing of retention was not uniformly associated with superior performance. Retention at any grade level was associated with less optimal academic and personal-social outcomes. Nonretained students demonstrated higher grades and test scores, and fewer academic, emotional, and behavioral problems than the retained group. The study concluded that retention did not equalize outcomes even when the retained student had been in school one year longer.

Holmes (1989) conducted a meta-analysis of research on student retention. Out of 63 controlled studies where retained students were followed and then compared to equally poor-achieving students who went directly on to the next grade, 54 showed overall negative effects from retention both socially and academically. In the nine positive studies, the apparent benefit of retention tended to diminish over time such that differences in performance disappeared in later grades. Retained students on average compared to matched controls were also reported to do more poorly on follow-up measures of social adjustment, attitudes toward school, behavioral outcomes, and attendance.

Walters and Borgers (1995) reviewed recent literature and research concerning the effects of retention on academic achievement and social and psychological development in elementary grades. Most of the research indicated that retaining students at the elementary school level does not effectively increase academic achievement

among low-achieving students and does not have a positive effect on students' social and psychological development.

The education literature provides strong evidence that poor and minority children are more likely to be retained (Foster, 1993). A number of research studies report that disproportionate numbers of retained students were minority and/or of low socioeconomic levels. Male students were also more likely to be retained than female students (Carstens, 1985; Doyle, 1989; House, 1989; Jackson, 1975; Mantzicopoulos, Morrison, Hinshaw, and Carte, 1989; Marcon, 1993; Moran, 1989).

Haberman and Dill (1993) state that educational reforms, such as tough new standards for graduation and additional comprehensive testing, are frequently accompanied by increased grade retentions. Ironically, these practices may hurt the very students they were designed to motivate, including those living in poverty. Historically, the percentages of students retained in grade rises proportionately with the use of minimum competency testing (Shepard and Smith, 1989). Anderson (1992) adds that the trend towards minimum competency testing in the 1970's and the excellence in education movement of the 1980's have invigorated the practice of retention.

Roderick (1994) points out that one of the most consistent findings in research on school dropouts is that high school students who drop out are more likely than graduates to be overage for grade or to have repeated grades previous to high school. The Youth in Transition Study reported that one grade retention increased the risk of dropping out by 40-50 percent and being two grades behind increased the risk by 90 percent (Bachman, Green, and Wirtanen, 1971). The High School and Beyond survey reported that sophomores who repeated at least one previous grade dropped out at twice the rate of those who had never repeated a grade (Barro and Kolstad, 1987). Research on school dropouts in California found similar results (Association of California Urban School Districts, 1985), reporting that dropouts were five times more likely than high school graduates to have repeated a grade. Students who had repeated two grades had a probability of dropping out of nearly 100 percent.

A few studies have reported some positive social outcomes for elementary retained students. In a study by Pomplun (1988), the author found that retained elementary grade students' self-concepts appeared stable over a two-year period following retention. In another study of elementary retained students, Finlayson (1977) found no differences in self-concept for promoted and nonpromoted elementary students. While a few studies have reported some positive social outcomes for elementary retained students, many studies have found retention to have negative effects on students' self-esteem. Children tend to see retention as punishment and a stigma (Bocks, 1977; Bossing and Brien, 1980; Goodlad, 1954; Moran, 1989; Niklason, 1984). Research related to childhood stressors (Yamamoto, 1980) showed that

students rated the prospect of retention in grade as more stressful than "wetting in class" or being caught stealing. The only factors rated by students as more stressful than retention in grade were going blind or losing a parent.

Research on kindergarten retention or extra year programs, including transition classrooms before first grade and developmental kindergarten before kindergarten, have not supported the benefits claimed for these types of programs. Karweit and Wasik (1992) reviewed the effects of three educational practices for first grade: kindergarten retention, developmental kindergarten, and transitional first grade. The review was based on studies that compared students who were placed in these programs with students who were recommended for placement but whose parents refused to place them in the program. The results of the three studies on kindergarten retention and the two longitudinal studies on developmental kindergarten showed a favorable result in the retention year, followed by a fading of positive effects over time. The results of the seven studies on transitional first grade did not support the practice's long term effectiveness as an educational intervention. The review concluded that none of the practices was more effective than simple promotion. Shepard (1989) reviewed 16 controlled studies on the effects of extra-year programs. The major finding was that these programs offered no benefit to participating students compared to those students who did not participate in the extra year program. The conclusion of no benefit was true even in situations where a special transition curriculum was used rather than just repeating kindergarten.

Shepard and Smith (1990) state that researchers still question why it is that retention does not benefit students. It is speculated that the emotional effects of retention on students negatively impact later learning. Other researchers have suggested that retention is ineffective as it simply requires a child to go through the same information again often with no other intervention. A student may have failed because of poor teaching or a poor quality program; repeating a grade with the same teacher or curriculum will not solve the problem.

There are alternatives to retention that are both more cost efficient and more effective in helping students academically. Remedial help, before and after school programs, summer school, instructional aides to work with target children in the regular classroom, cooperative learning, and tutorial programs including peer tutoring and cross-age tutoring are examples of such programs (Shepard and Smith, 1990; Martinez and Vandegrift, 1991; Charles, 1993; Meisels and Liaw, 1993; Harvey, 1994).

Texas Student Retention Policy Overview

Over the decade from 1984 to 1993, Texas state laws and State Board of Education (SBOE) rules pertaining to the retention and promotion of students moved from establishing consistent promotion policies to recognizing repercussions of retention to advocating alternatives for assisting students to funding retention reduction programs. Each revision of law and SBOE rule during that period provided greater flexibility to districts in making decisions about the most appropriate academic settings for individual students. Sunset legislation passed in 1993 required the Texas Legislature to readopt the entire Texas Education Code (TEC) in 1995. Consistent with the emphasis throughout the new code toward deregulation, the legislature repealed former law that imposed direction on districts regarding student retention.

Promotion and Retention Policy

Former TEC §21.721 (TEC, 1994), *Grade Requirement for Advancement or Course Credit*, enacted in 1984, stated that districts may not grant social promotions. Students could be promoted only on the basis of academic achievement. SBOE rules implementing that law were enacted the following year. Texas Administrative Code (TAC) Title 19, Chapter 75, Subchapter H, *Promotions and Alternatives to Social Promotion* (TAC, 1994), outlined the grading procedures districts were to use and guidelines for promotion. In 1991, the rule prohibiting retention of students below the first grade was amended to allow districts to assign six-year-old students who were not developmentally ready for first grade to a grade deemed appropriate by the school (19 TAC §75.195(i), 1994). This included placement in extra-year programs such as pre-first, transitional first, and developmental first grade programs that result in retentions.

Also in 1991, the law was updated to eliminate the prohibition on advancing a student with a grade average below 70. Changes also allowed school districts to adopt policies regarding how students are to be advanced from one grade level to the next. Local policies had to take into consideration a number of factors when considering the promotion of a student, and before retaining a student, districts had to consider alternatives for assisting the student.

In the new code adopted in 1995, TEC §28.021, *Student Advancement*, states that students may be promoted only on the basis of academic achievement or demonstrated proficiency. The remainder of the former language regulating local policies related to promotion and retention was repealed. In April 1996, SBOE rules implementing the former law were also repealed, removing restrictions on the number of times a student could be retained in grade.

At Risk Criteria

In 1988, TEC §21.557, *Compensatory and Remedial Instruction,* was expanded by defining students in Grades 7-12 who are at risk of dropping out of school and requiring districts to provide remedial and support programs for these students (TEC, 1994). The definition of students at risk included students who were not advanced from one grade level to the next one or more school years. This definition was carried over to the new code (TEC §29.081).

Retention Reduction Programs

A retention reduction grant program was enacted as TEC §21.562 in 1993 (TEC, 1994). A $5 million appropriation allowed 54 Texas school districts to pilot extended instructional programs to eliminate retentions in the first grade during the 1993-94 school year. The pilots were extended to the second grade in 1994-95. The Retention Reduction Grants provided school districts with alternatives to retention such as lengthening the school day, week, and year. This enabled recipient districts to provide additional instruction to students who needed extra assistance to master the essential elements of the state curriculum for their grade level.

Also in 1993, TEC §21.563, *Optional Extended Year Program,* was added to allow a school district not receiving a grant as part of TEC §21.562 to apply to the commissioner of education for approval to provide an extended year program. To fund such programs, with the commissioner's approval, a school district could reduce the number of instructional days for students during the regular school year.

The new TEC adopted in 1995 includes a single set of provisions for extended year programs (TEC §29.082). The commissioner is directed to withhold 5 percent of the Foundation School Program compensatory education allotment to finance extended year programs. This increased the allocation for extended year programs to about $50 million a year. Districts may use a portion of their compensatory education allotments or apply for state funds to implement an extended year program for students in kindergarten through Grade 8 who are identified as likely not to be promoted to the next grade level for the succeeding school year. Program requirements are similar to those for the former pilot programs; however, although districts must apply to receive the funds for extended year programs, they are no longer required to apply for approval of operating an extended year program if the program is being funded at the local level.

Students who attend at least 90 percent of the extended year program days must be promoted unless the school receives a request from the parent that the student not be promoted. Upon receipt of such a request, the principal, teacher, and counselor must meet with the parent to explain longitudinal statistics on academic performance of

students who are retained, and provide information on the effect of retention on student self-esteem and the likelihood of a retained student dropping out.

Commissioner's rules implementing the new optional extended year program were adopted to be effective in May 1996 (19 TAC §105.1001).

Retention Data Reporting

In 1991, TEC §11.204, *Student Retention Information,* was added, requiring the SBOE to collect and report information relating to grade level retention of students, including specifications regarding the type of data to be collected (TEC, 1994). In 1995, the new TEC repealed all specifications regarding the type of retention data to be collected (TEC §29.083). Reporting of retention data was incorporated into a Comprehensive Biennial Report to be prepared by the Texas Education Agency (TEA) prior to each legislative session (TEC §39.182).

Methodology

As mentioned above, in 1991 TEA was required to collect and report information relating to grade level retention of students. At the time, the law required information on the number of students retained, recommended for retention but not retained, recommended for advancement, or advanced from kindergarten to a transitional kindergarten or transitional first grade rather than a regular first grade class. In order to meet this requirement, implementation of the Year-End-Status data collection began with the 1991-92 school year. Grade level retention was determined by the Year-End-Status reported by districts and an adjustment made to reflect actual grade level enrollment of students in the subsequent school year (TEA, 1995a). The total retention counts were adjusted to include students enrolled in the same grade in both school years who were not reported as retained in the Year-End-Status data. All students who left the district before the end of the school year or whose retention status was pending at the end of the year were excluded from the total student counts used in this methodology. Further, the total retained counts were adjusted only upward through the enrollment comparison. (Some students who were reported to be retained by the Year-End-Status, might have actually been promoted in the following year and the total retention counts were not adjusted for such students.) An investigation of the validity of the Year-End-Status reporting found that about 60 percent of students had a Year-End-Status of retained and enrolled in the same grade the following year. Due to the potential limitations of the previous methodology and data collection method and the repealed legislation regarding the specific type of retention data to be collected, a new method based primarily on the analysis of actual enrollment data was implemented for the 1994-95 retention analysis.

Table 1 presents comparative summary information on the changes in the methodology. The two major advantages of the new method are (1) no additional data collection from school districts was required and (2) a relatively simple criterion and definition for retention were applied to all grade levels.

Table 1. Comparative Summary Information on the Methodology

	Old Method	New Method
Criteria	• The End-of-Year Status as reported by the district • Comparison of the End-of-Year Status and the enrollment for the following year (Adjustment)	• Comparison of the grade level for the last-six-week record of the first year and the enrollment for the following year
Retained	**K-8** • Retained in the same grade • Promoted from a transitional program to a regular classroom **9-12** • Not advanced to the next grade **K-12 (Adjustment)** • Students not reported as retained in the End-of-Year Status who were enrolled in the same grade the following year	**K-12** • Students in the Texas public school system who enrolled the following year in the same grade as their grade in the last reported six-week period of the first year
Total Students	**K-8** • Promoted to the next grade • Retained in the same grade • Placed in the next grade • Placed in a transitional program • Promoted from a transitional program to a regular classroom setting in the same grade **9-12** • Advanced to the next grade • Not advanced to the next grade • Graduates • Obtained GED certificate • Met all graduation requirements but did not pass exit-level Texas Assessment of Academic Skills (TAAS) test	**K-8** • Advanced to the next grade • Not Advanced to the next grade **9-12** • Advanced to the next grade • Not Advanced to the next grade • Graduates

Data Collection

The Public Education Information Management System (PEIMS) was used to collect data on the grade level of students in the Texas public school system (TEC §29.083). The number of total retained and total students were determined by the comparison of the grade levels at the last six-week period in attendance of the first year and October enrollment data for the subsequent year.

Grade Level Retention

Student level files were compared to identify students who were enrolled both years, who left after the first year, and who were new to Texas public schools in the second year. Total students used to compute grade level retention rates include students who attended any six-week attendance period of the first year and returned in the following year or graduated after the end of the first year. Students who dropped out or migrated out of Texas public schools after the first year were excluded from the total student counts. For students enrolled in both years, the number enrolled in the same grade was determined. All students who enrolled in the same grade for two consecutive years were identified as retained. The retention rate was calculated by dividing total number retained by total number of students.

Trends in Grade Level Retention

In order to investigate trends in grade level retention under the new methodology, grade level retention is calculated for the 1992-93 and 1993-94 school years, in addition to 1994-95. Changes in retention rates were investigated across grades, ethnic groups, and gender. Subsequent years of data collection may be necessary to clarify the trends in grade level retention in Texas public schools.

Grade Level Retention of Students

Number of Students Retained

Table 2 on page 10 shows the grade level retention for the 1992-93, 1993-94, and 1994-95 school years. Of the total number of Texas public school students reported in kindergarten through Grade 12 in the 1992-93 school year, 136,754, or 4.4 percent were retained in grade. The total retained decreased to 125,959, or 4.0 percent in the 1993-94 school year and remained steady in the 1994-95 school year with 4.0 percent.

Table 2. Historical Review of Grade Level Retention			
Year	**Total Students**	**Number Retained**	**Retention Rate**
1992-93	3,094,671	136,754	4.4%
1993-94	3,129,085	125,959	4.0%
1994-95	**3,193,214**	**128,369**	**4.0%**

The number retained and retention rates for the 1992-93 and 1993-94 school years displayed in Table 2 are slightly less than (approximately 0.7 percentage points) the retention rates previously reported for the same period (TEA, 1995a). This difference is due to the change in methodology. Previously, the total retained counts included all students who were reported to be retained in the Year-End-Status data collection even if they were not actually retained in the same grade in Texas public schools in the following year. Furthermore, according to the current methodology, students who dropped out of school after the end of the first year, some of who would have been retained in the following year, were not included in the total student counts. Only the students who were continuing in the Texas public schools were considered in determining the retention counts.

Grade Level Retention by Grade

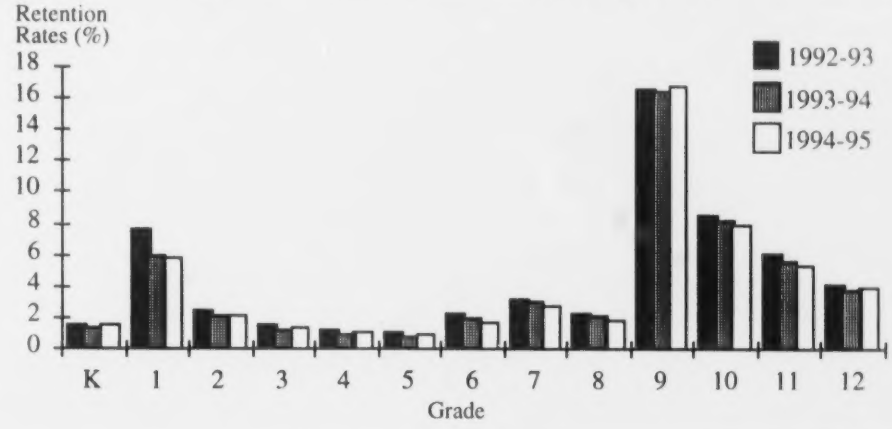
Figure 1 graphically displays the percentage of students retained in each grade over the three year period from 1992-93 to 1994-95. As the figure indicates, the percentage of students retained varied markedly by grade. The highest percentage of students retained was in the ninth grade and this trend showed little variation over the three year period. The retention rates for all high school grades were also well above the average retention rate for all students. In the elementary grades, students in the first grade have been most frequently retained at their grade.

Grade Level Retention in Grade 1

Table 3 presents the number and percentage of students retained in Grade 1 by ethnicity. The greatest decrease in the percentage retained between 1992-93 and 1993-94 occurred at Grade 1. In 1993-94, the retention rate dropped to 6.0 percent from 7.7 percent the prior year. In 1994-95, the retention rate for Grade 1 was 5.8 percent, which was still the highest rate among elementary grades.

BEST COPY AVAILABLE

Figure 1. Trend in Retention Rates by Grade



The significant decrease (1.7 percentage points) in the 1993-94 school year can be partly attributed to the Retention Reduction Pilot Programs instituted in the 1993-94 school year. These programs allow first grade students who had not been successful in mastering the curriculum up to 30 additional days to acquire the essential elements needed for promotion. In a study conducted by TEA, Retention Reduction Programs were evaluated during the first year of implementation to determine the effectiveness of these programs in providing a cohort of students with the essential elements needed for promotion to the second grade. Of the 9,672 first-grade participants, 92 percent were promoted to the second grade at the end of the program (TEA, 1994). According to the report, Retention Reduction Programs are cost-efficient and a more viable alternative to the practice of retaining students for a full year. The average per-pupil cost to implement the Retention Reduction Pilot Program was $517. Such cost-efficient retention reduction programs can also offer potential for future savings and a lower dropout rate for older students, especially ninth graders.

Other programs designed to reduce the probability for later school failure for at-risk children include prekindergarten programs. In 1984, House Bill 72 mandated prekindergarten education for high-risk four-year-old children in Texas public

Table 3. Students Retained in First Grade

Year	White		African American		Hispanic		Other Minority		Total	
	Total Retained	Retention Rate	Total Retained	Retention Rate	Total Retained	Retention Rate	Total Retained	Retention Rate	Total Retained	Retention Rate
1992-93	7,464	5.7%	3,729	9.7%	9,591	9.6%	280	4.8%	21,065	7.7%
1993-94	6,045	4.8%	2,721	7.1%	7,482	7.4%	231	3.8%	16,479	6.0%
1994-95	5,714	4.6%	2,708	7.0%	7,353	7.1%	223	3.4%	15,998	5.8%

BEST COPY AVAILABLE

schools. In 1989, TEA piloted prekindergarten programs for limited English proficient three-year-olds or those from low-income families (TEA, 1992). Based on an evaluation of public school prekindergarten programs in Texas, conducted by TEA, children who attend prekindergarten programs are less likely to be retained in grade than children who are eligible but do not attend prekindergarten (TEA, 1995b).

Of the 274,320 first graders in 1994-95, 117,741 attended public school prekindergarten programs in 1992-93. The retention rate of first graders who had attended public school prekindergarten was 6.9 percent, compared to 7.4 percent for children who were eligible but did not attend. First graders not eligible for public school prekindergarten had a retention rate of 4.0 percent.

Grade Level Retention in Grade 9

The highest retention rates for the secondary grades are found in the ninth grade. Table 4 displays the number and percentage of students retained by ethnicity in Grade 9 for the three-year period. The total number of students repeating Grade 9 was 41,334 (16.7%) during the 1992-93 school year, 42,004 (16.5%) during the 1993-94 school year, and 45,432 (16.8%) during 1994-95 school year. Approximately one out of six ninth grade students was repeating the grade each year. The number of Hispanic and African American students retained in ninth grade was disproportionately larger than White students and students in other ethnic groups. Approximately one-fourth of all students in these ethnic groups were retained in ninth grade.

Grade Level Retention by Gender

Males were more likely to be retained than females, as the percentage retained for males was consistently higher than that for females at every grade level and for each ethnic group. About 3.6 percent of female students were retained in the 1992-93 school year, compared to 5.3 percent of males in the same period. During the 1993-94 and 1994-95 school years, 3.2 percent of female and 4.8 percent of male students were retained. Though the overall retention rates generally have decreased since the

1992-93 school year, the gender gap continued to exist over the years. Male students made up 61 percent of total retained students over the three-year period.

Grade Level Retention by Ethnicity

Historically, minority students have been overrepresented in the population of students being retained. As Figure 2 shows, Hispanic and African American students were, on average, retained more than twice as often as White or other ethnic group students. The retention rates for Hispanic students were 6.4 percent during the 1992-93 school year, 5.7 percent in 1993-94, and 5.6 percent in 1994-95. In 1992-93, the retention rate for African American students was less than the rate for Hispanic students with 6.1 percent and was identical to Hispanic students in the 1993-94 and 1994-95 school years. The retention rates for White and other ethnic group students were the same with 2.7 percent in the 1992-93 school year and 2.3 percent in 1994-95. In the 1993-94 school year, the retention rates for White and other ethnic group students varied slightly. Hispanic and African American students retained across all grade levels constitute approximately 68 percent of all students retained each year during the three-year period. That is, almost 7 out of 10 of all retained students were either Hispanic or African American.

The largest decline in the percentage retained occurred for Hispanic students between the 1992-93 and 1993-94 school years, from 6.4 percent down to 5.7 percent. However, Hispanic students still make up the largest group of those retained across all grade levels except for kindergarten where White students make up the largest percentage of students retained. As Figure 3 on page 14 indicates, Hispanic students make up the largest percentage of total students retained, followed by White students, and this trend is consistent over the three-year period.

Figure 2. Grade Level Retention by Ethnicity

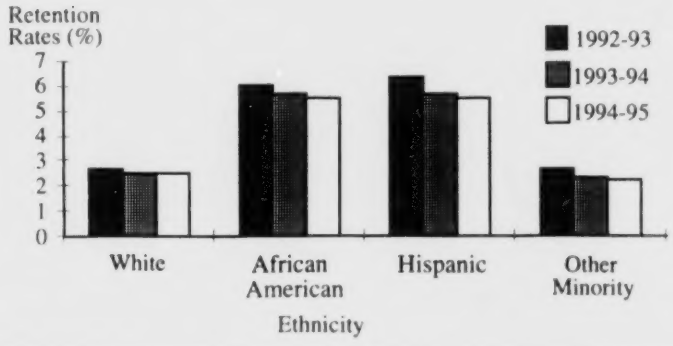

Figure 3. Percentage of Total Retained by Ethnicity

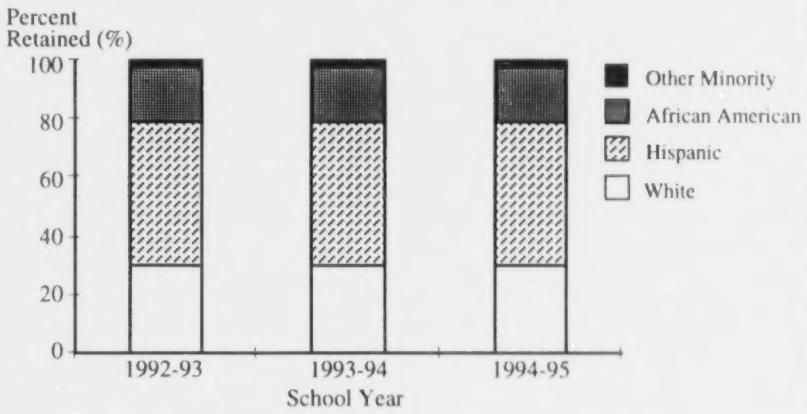

Appendix A summarizes the grade level retention for the 1992-93, 1993-94, and 1994-95 school years by grade and ethnicity. The table illustrates the number of students retained and the percentage retained in each grade and ethnic group.

Grade Level Retention by Student Characteristics

Overage Students

Research has consistently shown that being overage for grade is one of the primary predictors of dropping out of school in later years. One consequence of being retained in the same grade is being overage for grade; being overage doubles the likelihood of students being retained, which in turn makes them yet another year older than their classmates. Being overage for grade is a better predictor of dropping out than underachievement. Students held back seldom "catch up" academically and often fall further behind and very often drop out (Holmes, 1983; Shepard & Smith, 1989; Roderick, 1994).

The results for Texas indicate that overage students were retained more than twice as often as their at-age counterparts. The percent retained for overage students were 7.8, 7.5, and 7.6 in the 1992-93, 1993-94, and 1994-95 school years, respectively, compared to 3.4, 3.1, and 3.1 percent for at-age students for the same period.

Special Education Students

Table 5 shows the retention rates of students in special education programs for the three-year period compared to the retention rates of students in non-special education classrooms for the same period. Students in special education programs have

individual education plans with goals and objectives they must meet on a yearly basis. If these goals are met the student progresses to the next grade level. Table 5 shows that a disproportionately larger number of special education students were retained each year compared to their non-special education counterparts.

Table 5. Grade Level Retention of Students in Special Education

Year	Special Education Students		Non-Special Education Students	
	Total Retained	Retention Rate	Total Retained	Retention Rate
1992-93	22,640	6.4%	114,114	4.2%
1993-94	22,434	6.0%	103,525	3.8%
1994-95	23,633	6.0%	104,736	3.7%

Bilingual/LEP Students

Students with limited English proficiency (LEP) are under the burden of learning English at the same time they are learning reading and other skills. Reading and language problems have been shown to be highly correlated with elementary grade retention (Kaczala, 1991; Marcon, 1993). Depending on their level of English skills, some LEP students enroll in bilingual or English as a second language (ESL) programs. In 1994-95, 82.5 percent of LEP students were in bilingual/ESL programs. The retention rates for LEP students are presented in Table 6. The table has been aggregated into two grade spans due to the small number of secondary students receiving bilingual services.

All three groups of LEP students in the elementary grades had similar retention rates, and slightly higher rates than non-LEP students in 1994-95. The rates for all three

Table 6. Grade Level Retention of Students With Limited English Proficiency (LEP)

Grade	Year	Receiving Bilingual Services		Receiving ESL Services		Receiving No Services		Total Students With LEP		Total Non-LEP	
		Total Retained	Retention Rate	Total Retained	Retention Rate	Total Retained	Retention Rate	Total Retained	Retention Rate	Total Retained	Retention Rate
KG - 6	1992-93	5,885	4.1%	2,480	4.5%	960	3.8%	9,325	4.1%	38,264	2.4%
	1993-94	4,637	2.9%	2,133	3.4%	735	2.9%	7,505	3.0%	30,970	2.0%
	1994-95	4,803	2.8%	2,141	3.1%	740	2.8%	7,684	2.9%	30,816	2.0%
7 - 12	1992-93	94	4.7%	7,198	13.1%	2,308	12.3%	9,600	12.7%	79,565	6.6%
	1993-94	55	6.1%	7,447	12.4%	2,201	10.6%	9,703	12.0%	77,781	6.4%
	1994-95	64	4.9%	7,772	12.1%	2,407	11.0%	10,243	11.7%	79,626	6.4%

groups have decreased every year since 1992-93. This decrease across the three years is also reflected in the Hispanic retention rates shown in Figure 2 on page 13. Few students in secondary grades receive bilingual services. The retention rates for secondary students receiving ESL services and LEP students not receiving services were almost twice as high as non-LEP students for the three years shown.

Economically Disadvantaged Students

As Table 7 indicates, the retention rates for students identified as economically disadvantaged have decreased slightly over the three-year period; however, the retention rates for economically disadvantaged students are consistently higher than those for other students. The percentages of students in Texas public schools identified as economically disadvantaged have increased slightly, from 39.5 percent in 1992-93, to 41.5 percent in 1993-94, and 42.8 percent in 1994-95. Further, the percentages of retained students identified as economically disadvantaged have increased over the three-year period; 48.9, 50.8, and 51.6 percent for the 1992-93, 1993-94, and 1994-95 school years, respectively.

Table 7. Grade Level Retention of Economically Disadvantaged Students

	Economically Disadvantaged Students		Non-Economically Disadvantaged Students	
Year	Total Retained	Retention Rate	Total Retained	Retention Rate
1992-93	66,869	5.5%	69,885	3.7%
1993-94	63,935	4.9%	62,024	3.4%
1994-95	66,237	4.9%	62,132	3.4%

Grade Level Retention by District/Campus Characteristics

District Characteristics

Texas school districts differ greatly based on characteristics such as community type, size, student performance, and expenditures. The retention rates among these categories differ as well. Appendix B includes a listing of retention rates by district characteristics for 1994-95.

Districts in urban areas had the highest retention rates in 1994-95. Higher retention rates were generally associated with districts with higher percentages of minority students, higher percentages of economically disadvantaged students, higher than average teacher salaries, larger percentages of minority teachers, and lower percentages of students passing the Texas Assessment of Academic Skills (TAAS). Districts with these characteristics are typically found in the urban areas.

Campus Characteristics

As with districts, higher retention rates were also generally associated with campuses in urban areas. Campuses with higher percentages of minority students, higher than average teacher salaries, larger percentages of minority teachers, and lower percentages of students passing the TAAS tended to have higher retention rates. Campuses with a higher percentage of students dropping out also had higher retention rates. This is not surprising given the earlier discussion of retention being the highest predictor of dropping out. The relationship between retention rates and percentage of economically disadvantaged students seen at the district level was not seen in the campus-level data. Appendix C includes a listing of retention rates by campus characteristics for 1994-95.

Year-round Education

One significant change occurring in public education today is the switch to year-round education. Year-round education is the reorganization of the school calendar to ensure continuous learning without the interruption of the summer months (Warrick-Harris, 1995). The traditional curriculum content continues to be used with the idea that students will retain more information across several small breaks throughout the year rather than across the normal ten-week summer vacation (Morse, 1992). Year-round education can also relieve overcrowding in schools. Schools on a multi-track system release a percentage of students to vacations each term throughout the year so that the capacity of the school building can be increased by 25 to 50 percent, depending on the number of attendance tracks (White, 1988).

In an evaluation study of Texas year-round schools, Opheim, Mohajer, and Read (1995) surveyed the attitudes of a sample of elementary school principals in Texas and found that principals supported the hypothesis that year-round education increased student achievement in several areas including fewer problems with retaining information, benefits to special education and LEP students, additional learning from enrichment programs, and higher standardized test scores.

In 1994-95, 313 campuses were providing year-round education. About 75 percent are elementary year-round campuses. Year-round campuses in Texas are either on a complete year-round calendar or part of the campus is on a year-round calendar and part is on a traditional calendar. To investigate grade level retention in year-round campuses, only those campuses with complete year-round calendars (205) were used in comparison to schools with complete traditional calendars (6,139).

Year-round campuses in Texas are typically larger campuses with high percentages of economically disadvantaged students. Twenty-two of the year-round campuses

Table 8. Grade Level Retention for Year-Round Schools Versus Traditional Schools

Campus Type	Year-Round Calendar		Traditional Calendar	
	Total Retained	Retention Rate	Total Retained	Retention Rate
Elementary	1,649	2.2%	30,757	2.1%
Middle	435	1.7%	15,598	2.3%
High School	1,218	12.7%	72,278	9.2%
All Levels	3,847	18.6%	4,559	7.7%
Total	7,149	3.2%	123,192	4.1%

are on a multi-track system, which could suggest fast-growing campuses with overcrowding. In a study conducted by Hazleton (1994), the author found that year-round education in Texas was primarily for student academic purposes, particularly for the economically disadvantaged, rather than for relieving overcrowding in schools.

Table 8 presents the retention rates for year-round education versus traditional education campuses by campus type. The retention rates for year-round middle school campuses are lower than those for middle school campuses on traditional calendars. The rates are about the same for elementary campuses on year-round and traditional calendars. The retention rates for year-round education campuses are higher for secondary campuses and campuses with all grade levels. About 29 percent of year-round secondary campuses are alternative education campuses versus 11 percent of traditional campuses, which may contribute to the higher retention rate of 12.7 percent.

Further analysis of retention rates for year-round campuses is recommended, including comparisons of year-round and traditional calendar campuses with similar demographic characteristics, and trends in retention rates of year-round campuses.

Conclusions

Grade level retention continues to be a common practice in Texas public schools. Approximately 130,000 students were retained each year during the 1992-93, 1993-94, and 1994-95 school years. Minority students make up the majority of students retained each year, with nearly 7 out of 10 retained students being Hispanic or African American.

The highest percentage of students was retained in the ninth grade. Among elementary grades, the highest retention rate was found in the first grade. The Retention

Reduction Pilot Program instituted in the 1993-94 school year appears to contribute to the marked decline in retention rate for the first grade in the 1993-94 school year. Such extended instruction programs can serve as a viable alternative to reduce the practice of grade level retention. A consistent gender difference was evident in retention rates over the three year period. Male students have higher retention rates than female students at every grade level, for all students and each ethnic group.

One result of being retained in grade is students who are overage for grade. Being overage for grade, the primary predictor of dropping out, doubled the likelihood of students being retained compared to their at-age peers. In general, students receiving special education services have higher retention rates than non-special education students. Students with limited English proficiency (LEP), who are under the burden of learning English at the same time they are learning other skills, were retained at higher rates than non-LEP students.

Texas campuses and districts differ greatly and the retention rates among them differ as well. Higher retention rates were generally observed in urban districts and districts and campuses with higher percentages of minority students and lower percentages of students passing the TAAS.

Year-round schools represent about five percent of all campuses in Texas and grade level retention among these campuses shows that secondary year-round campuses, like their counter parts on traditional calendars, have the highest retention rates. Year-round middle school campuses have the lowest rates, and have retention rates that are lower than middle school campuses on traditional calendars.

Future analysis of retention rates in Texas public schools should include further investigation of the high retention rates found in the ninth grade, later school dropout of retained students, retention rates in year-round schools, and reasons for grade level retention in Texas public schools.

Appendix B
TEXAS EDUCATION AGENCY
1994-95 DISTRICT ANALYZE CATEGORY DESCRIPTIONS

ENROLLMENT GROUPINGS

A nine-category grouping based on the total number of students enrolled by district as of the Public Education Information Management System (PEIMS) fall collection date (late October of each year). Enrollment excludes students who are served but not enrolled by districts.

DISTRICT TYPE

Classification of school districts based on factors such as size, growth rates, and proximity to urban areas as follows:

Major Urban. The state's eight largest metropolitan districts serving the Houston, Dallas, San Antonio, Fort Worth, Austin, Corpus Christi, and El Paso areas.

Major Suburban. Other districts in and around the major urban areas.

Other Central City. Major districts in other large Texas cities.

Other Central City Suburban. Other districts in and around the other large, but not major, Texas cities.

Independent Town. Largest districts in counties with populations of 25,000 to 100,000.

Non-Metro: Fast Growing. Districts not fitting in any of above categories but exhibiting a five year growth rate of at least 20 percent with at least 300 students enrolled.

Non-Metro: Stable. Districts not fitting any of above categories but with an enrollment exceeding the state median.

Rural. Districts not fitting any of above categories; districts either with an enrollment between 300 and the state median and a growth rate less than 20 percent, or with an enrollment less than 300.

PROPERTY WEALTH

Total taxable property value divided by enrollment, which indicates district ability to raise local funds on a per pupil basis. The property value used is total taxable value for the last completed calendar year—i.e., 1994, as determined by the Comptroller's

Property Tax Division (CPTD), whereas enrollment is for the 1994-95 school year. The first wealth grouping shows ten categories; the second simply shows districts above and below state average wealth; the third is a 20-category grouping with each category representing about five percent of the state's students. The six special statutory districts without taxable property wealth form a separate group in all three wealth groupings.

TOTAL TAX EFFORT
A four-category tax effort grouping of districts defined by the total effective tax rate, which was determined by dividing the last completed calendar year's total levy amount by that year's CPTD total taxable property value. The total effective rate is the sum of the school district maintenance and operations (M&O) rate, and the interest and sinking fund standardized rate. Rates are expressed per $100 of taxable value. The six special statutory districts without property tax levies appear separately.

MAINTENANCE AND OPERATIONS EFFECTIVE TAX RATES
A four-category tax effort grouping of districts showing the maintenance and operation (M&O) effective tax rate, which was determined by dividing the last completed calendar year's M&O levy amount by that year's CPTD total taxable property value. The M&O rate shown include the local standardized rate. The six special statutory districts without property tax levies appear separately.

HIGHEST PROPERTY VALUE CATEGORY
A 13-category CPTD classification based on property use. These 13 are aggregated into four categories as follows:

Residential. Single-family, multi-family, and residential inventory.

Land. Vacant lots and rural real (taxable).

Oil and Gas. Oil, gas, and minerals.

Business. Commercial and industrial real, commercial and industrial personal, and utilities.

A district is placed into one of the four categories above that represents its greatest total property value. The six special statutory districts without taxable property wealth form a separate group.

SMALL/SPARSE ADJUSTMENT
A four-category grouping of districts based on the small/sparse adjustment amount as a percent of the total adjusted basic allotment amount. A fifth category contains all districts receiving no small/sparse adjustment. This percentage represents the

extent to which state funding is adjusted to compensate for small and/or sparsely populated districts.

COST OF EDUCATION INDEX LEVEL
A five-category grouping of districts based on the Cost of Education Index (CEI) level. It reflects geographic variations in costs and prices outside district control.

OPERATING COST PER STUDENT
A five-category grouping of districts based on operating cost per student. Operating costs are the sum of all expenditures budgeted for the operation of the district for all funds. The operating expenditures are a subset of the total expenditures; they do not include debt service, capital outlay, or ancillary services expenditures. Per student amounts are the school year expenditures divided by enrollment. The source for budgeted expenditures is the fall PEIMS submission.

EDUCATION SERVICE CENTER REGION
The state is divided into 20 geographic regions; districts within each region are served by an Education Service Center.

TAAS: PERCENT PASSING ALL TESTS TAKEN
A five-category grouping of districts based on the percent passing the Texas Assessment of Academic Skills (TAAS). For Grades 3-8 and 11, the total number of students passing all sections taken of the TAAS is expressed as a percentage of the total number of students taking one or more tests. This percentage excludes special education students and third graders taking the test in Spanish.

SAT/ACT: PERCENT TAKING
A three-category grouping based on the percent of graduates taking the 1993-94 Scholastic Aptitude Test (SAT) and/or American College Testing Program's ACT Assessment. A fourth category is reserved for districts in which no SAT or ACT was administered.

SAT/ACT: PERCENT SCORING ABOVE CRITERION
A five-category grouping based on the percent of students who scored at or above the criterion (1000 on the SAT total, 24 on the ACT composite) for the 1993-94 SAT and/or ACT. A sixth category is reserved for districts in which no SAT or ACT was administered.

STUDENT DENSITY
A four-category grouping based on density, or the number of students enrolled per square mile. District square miles were determined through a joint effort by the State Property Tax Board (SPTB), the Texas Education Agency, and the Texas Water Commission. Maps provided by districts to the SPTB were digitized by the Water Commission to determine acreage. The six special statutory districts without available mileage information form a separate group.

ENROLLMENT CHANGE FROM PRIOR YEAR
A five-category grouping based on the growth or decline in district student population over a one year period. Districts with declining enrollment represent one category, while remaining categories show one-year growth rates ranging from "0%-3%" to "10% and over."

PERCENT AFRICAN AMERICAN, HISPANIC, AND MINORITY STUDENTS
Three six-category sets of groupings according to the ethnic composition of district student populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white populations expressed as a percentage of the total. Non-white populations include Native American or Alaskan Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic.

PERCENT LOW INCOME STUDENTS
A six-category grouping according to the district percentage of enrolled students classified as economically disadvantaged on PEIMS as follows:

a) Eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
b) From a family with annual income at/below the federal poverty line;
c) Eligible for AFDC or other public assistance;
d) Recipient of Pell Grant or comparable state need-based financial assistance program; or
e) Eligible for programs assisted under Title II of the Job Training Partnership Act.

AVERAGE TEACHER EXPERIENCE
A four-category grouping of average teacher experience years computed as total professional experience years for all district teachers divided by total teacher full-time-equivalent (FTE) count.

AVERAGE TEACHER SALARY
A four-category grouping by average district teacher salary computed as the total salary of teachers divided by the total teacher FTE count. Total salary amount does not include career ladder or any other supplement.

PERCENT OF TEACHERS WITH ADVANCED DEGREES
A four-category grouping by district percentage of teachers with advanced degrees computed as the FTE count of teachers with a master's or doctoral degree divided by the total teacher FTE count.

PERCENT MINORITY TEACHERS
A six-category grouping according to the minority composition of district teaching populations. Minority percent is calculated by summing all non-white teacher FTEs and dividing by the total teacher FTEs.

Appendix C
TEXAS EDUCATION AGENCY
1994-95 CAMPUS ANALYZE CATEGORY DESCRIPTIONS

CAMPUS TYPE
A four-category grouping based on the range of grades offered, as reported to the Texas Education Agency.

CAMPUS ACCOUNTABILITY RATING
This category refers to the campus rating based on the 1995 accountability system. A campus' rating is based on performance on the Texas Assessment of Academic Skills (TAAS) test, the dropout rate, and the attendance rate. The four levels of accountability ratings for campuses and the general conditions of each of the criteria are as shown:

Rating	TAAS Passing	Dropout Rate	Attendance Rate
Exemplary	>=90%	<1.0%	>=94%
Recognized	>=70%	<3.5%	>=94%
Acceptable	>=25%	<6.0%	n/a
Low-Performing	<25%	>=6.0%	n/a

Some campuses are shown as Pending or Not Rated. Campuses with a rating of Pending operate as alternative education programs and will be evaluated under an alternative education accountability system. Not Rated campuses include those that do not serve students within the 1st through 12th grade span, such as prekindergarten centers and early education through kindergarten schools, as well as schools that serve only students in special education.

AVERAGE TEACHER EXPERIENCE
A five-category grouping of average teacher experience years computed as total professional experience years for all campus teachers divided by total teacher full-time equivalent (FTE) count. The sixth category, "Not Applicable," pertains to campuses reporting enrollment but not teachers.

PERCENT OF TEACHERS WITH ADVANCED DEGREES
A five-category grouping by district percentage of teachers with advanced degrees computed as the FTE count of teachers with a master's or doctoral degree divided by the total teacher FTE count. The sixth category refers to campuses with unreported teacher FTEs or campuses with no teachers with advanced degrees.

PERCENT MINORITY, AFRICAN AMERICAN, AND HISPANIC TEACHERS

Two five-category and one four-category sets of groupings according to the ethnic composition of campus teacher populations, as reported on the Public Education Information Management System (PEIMS). Minority percent is calculated as the sum of all non-white populations expressed as a percentage of the total. Non-white populations include Native American or Alaskan Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic.

AVERAGE TEACHER SALARY

A six-category grouping by average campus teacher salary computed as the total salary of teachers divided by the total teacher FTE count. Total salary amount does not include career ladder or any other supplement.

AVERAGE STUDENT/TEACHER RATIO

A five-category grouping by average student/teacher ratio computed as the total number of students at each campus divided by the total teacher FTE count at the campus. The sixth category, "Not Applicable" pertains to campuses reporting enrollment but no teachers.

INSTRUCTIONAL COST PER PUPIL

A five-category grouping of campuses based on the instructional cost per pupil. Instructional costs are the sum of expenditures budgeted for all activities dealing directly with the instruction of pupils, including instruction through the use of computers. The per pupil amounts are the current school year budgeted expenditures divided by the current number of students in membership. The source for budgeted expenditures is the fall PEIMS submission.

ENROLLMENT GROUPINGS

A five-category grouping based on the total number of students enrolled by campus as of the PEIMS fall collection date (late October of each year). Enrollment excludes students who are served but not enrolled by districts.

PERCENT MINORITY, AFRICAN AMERICAN, AND HISPANIC STUDENTS

Three five-category sets of groupings according to the ethnic composition of campus student populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white populations expressed as a percentage of the total. Non-white populations include Native American or Alaskan Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic.

PERCENT INCREASE IN PUPILS
A five-category grouping of campuses based on the growth or decline in student population over a one year period. The last category, "New Campuses," refers to campuses reporting students in the fall of 1994 for the first time.

PERCENT ECONOMICALLY DISADVANTAGED PUPILS
A five-category grouping according to the campus percentage of enrolled students classified as economically disadvantaged on PEIMS as follows:

a) Eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
b) From a family with annual income at/below the federal poverty line;
c) Eligible for AFDC or other public assistance;
d) Recipient of Pell Grant or comparable state need-based financial assistance program; or
e) Eligible for programs assisted under Title II of the Job Training Partnership Act.

TAAS: PERCENT PASSING ALL TESTS TAKEN
A five-category grouping of campuses based on the percent passing the Texas Assessment of Academic Skills (TAAS). For Grades 3-8 and 10, the total number of students passing all sections taken of the TAAS is expressed as a percentage of the total number of students taking one or more tests. This percentage excludes special education students and third graders taking the test in Spanish.

AVERAGE DROPOUT RATE (1993-94)
A four-category grouping of campuses based on the total number of dropouts in Grade 7-12 expressed as a percentage of the total number of students in membership in Grades 7-12. A fifth category, "Not Applicable," refers to elementary grade level campuses.

SAT/ACT: PERCENT TAKING (1993-94)
A five-category grouping based on the percent of graduates taking the 1993-94 Scholastic Aptitude Test (SAT) and/or American College Testing Program's ACT Assessment. A sixth category is reserved for campuses in which no SAT or ACT was administered.

SAT/ACT: PERCENT SCORING ABOVE CRITERION
A five-category grouping based on the percent of students who scored at or above the criterion (1000 on the SAT total, 24 on the ACT composite) for the 1993-94 SAT and/or ACT. A sixth category is reserved for campuses in which no SAT or ACT was administered.

Notes

COMPLIANCE STATEMENT

TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

(1) acceptance policies on student transfers from other school districts;

(2) operation of school bus routes or runs on a nonsegregated basis;

(3) nondiscrimination in extracurricular activities and the use of school facilities;

(4) nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;

(5) enrollment and assignment of students without discrimination on the basis of race, color, or national origin;

(6) nondiscriminatory practices relating to the use of a student's first language; and

(7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

TITLE VII, CIVIL RIGHTS ACT OF 1964 AS AMENDED BY THE EQUAL EMPLOYMENT OPPORTUNITY ACT OF 1972; EXECUTIVE ORDERS 11246 AND 11375; EQUAL PAY ACT OF 1964; TITLE IX, EDUCATION AMENDMENTS; REHABILITATION ACT OF 1973 AS AMENDED; 1974 AMENDMENTS TO THE WAGE-HOUR LAW EXPANDING THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967; VIETNAM ERA VETERANS READJUSTMENT ASSISTANCE ACT OF 1972 AS AMENDED; IMMIGRATION REFORM AND CONTROL ACT OF 1986; AMERICANS WITH DISABILITIES ACT OF 1990; AND THE CIVIL RIGHTS ACT OF 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Employment Opportunity/Affirmative Action employer.
